SLOGGING HAMMER

SAFETY OPERATING PRECAUTIONS

"SAFETY ISN'T JUST A SLOGAN, IT'S A WAY OF LIFE"

SLOGGING HAMMER SAFETY PRECAUTIONS:

SAFETY PRECAUTIONS:

To ensure the safe use of the slogging hammer the following safety regulations must be adhered to:

1. HAND AND FOOT PROTECTION

To prevent hand and foot injuries:

- Always wear your company approved safety hand gloves.
- Always wear your company approved safety shoes.
- Keep your hands free from all impact areas on the hammer.

Figure 1

2. EYE PROTECTION

To prevent eye injuries from shrapnel:

- Always wear your company approved safety goggles / safety glasses.

3. HEARING PROTECTION

To seal out high noise and protect hearing:

- Always wear your company approved safety ear plugs / ear protection.

4. SAFETY HARNESS

When using the slogging hammer at heights greater than 1.2 meters:

- Secure the slogging hammer with your company approved safety harness.

5. SAFE USE OF THE SLOGGING HAMMER

- Ensure that the safety pin is properly in place and secure when fitting/changing manufacturers' approved slogging spanners. Do not operate the slogging hammer if the safety pin is not in place and secured
- Ensure that the safety eyebolt is properly in place and secured.
- Ensure that no other person/body parts are in contact with or in close proximity whilst the slogging hammer is in use or being operated.
- Only manufacturer approved slogging spanners must be used.

6. MAINTENANCE AND STORAGE OF THE SLOGGING HAMMER:

Proper maintenance and storage of the slogging hammer will prolong the lifespan of the slogging hammer and prevent rust build-up:

- After usage, the slogging hammer and slogging spanners must be cleaned and dried.
- Responsible handling of the slogging hammer is essential (i.e. do not abuse)

7. DANGEROUS PRACTICES TO BE AVOIDED WHEN OPERATING THE SLOGGING HAMMER:

To ensure that the slogging hammer is safely operated as per the Manufacturers' instructions, the following practices are considered dangerous and should be avoided at all times:

- Using the eyebolt/handle to tie the slogging hammer to any device for the purpose to pull the slogging hammer either by hand/or any other device. The slogging hammer is designed for the sole purpose of loosening and tightening of nuts and bolts.
- Hitting the slogging hammer with any foreign object /device.
- Using the slogging hammer to apply any leverage.
